Inpactor

Blockchain-based Corporate Social Responsibility
for a generation of purpose beyond profit.

ICO CANCELLED

After many discussions and considerations with the clients, potential investors, advisors, and the Incitement team, we regret to inform you that the Inpactor ICO, scheduled to start on July 1st 2018, has been cancelled.

Having worked relentlessly towards the launch of Inpactor, and concurrently prepare for the ICO, we have come to understand that conducting a token sale at this stage is not healthy for the Inpactor platform.

The MVP for Inpactor will be released over the coming few weeks. And because we are still in the very early stages of the life cycle of the platform, it is inevitable that there will be a lot of iterations. We believe it is better to focus most of our time and resources on Inpactor's development, and do not want to disappoint token holders in the process.

Therefore we will focus first on building the blockchain application of CSRi into the platform only, and at a later stage, when the core of the platform has been developed and tested, focus on the implementation of CSRm.

Incitement will continue to fund the development of Inpactor on its own, and proceed with raising a round of funds through the traditional route for this time being.

We apologise to those who have been anticipating the Inpactor ICO, those who have participated in the bounty campaign, and everyone else who has been involved with this ICO.
